+1 801 440 5615

Professional Summary

Senior Full Stack Software Engineer with 20+ years of professional experience, building scalable applications using React, TypeScript, and backend systems across many databases and cloud architectures. Focused on system design, APIs, performance optimization, and data-intensive workflows.

Willing to relocate: Anywhere

Authorized to work in the US for any employer

Work Experience

Senior Full Stack Software Engineer

Carketa-Lehi, UT

September 2022 to Present

- Designed and implemented front-end architecture and user-facing features using React, TypeScript, and Next.js, improving usability, performance, and user engagement.
- Optimized large-scale analytics workflows, cutting BigQuery costs and saving thousands of dollars per month by implementing a hybrid BigQuery and AlloyDB / PostgreSQL solution, improving query performance and reliability.
- Developed DevOps tooling and automation scripts to optimize data pipelines, improve reliability, and reduce operational overhead across data-intensive systems.

Senior Full Stack Software Engineer

nth-child consulting-Orem, UT

November 2017 to September 2022

- Modernized legacy PHP applications by migrating to a Next.js-based stack, cutting compute costs and saving thousands of dollars per month.
- Built customer-facing proposal software for solar companies, significantly increasing client revenue through faster sales cycles and improved conversion.
- Developed a reusable SDK enabling companies to design, customize, and integrate their own proposal software on top of the platform.

Senior Full Stack Software Engineer

Grow-Provo, UT

February 2014 to November 2017

- Developed real-time business intelligence dashboards using React and TypeScript, enabling customers to optimize campaigns and drive measurable revenue growth.
- Built and maintained large-scale data ingestion pipelines using Node.js and Express, integrating hundreds of third-party APIs and supporting revenue-generating data products.
- Designed and implemented a PostgreSQL-based data warehouse that powered analytics and reporting for clients, contributing to millions of dollars in annual contract value.

Senior Full Stack Software Engineer

Rain-American Fork, UT

March 2013 to February 2014

- Developed a CakePHP-based REST API integrating education-sector services (School Specialty, Clever, SES, Twilio) to support real-time messaging and scheduling.
- Built a SaaS platform used by students, teachers, and administrators to manage events, coursework, and notifications across multiple institutions.
- Designed application workflows with offline support, improving reliability and usability in low-connectivity environments.

Senior Full Stack Software Engineer

Zagg-Salt Lake City, UT

December 2010 to February 2013

- Developed secure payment processing APIs using PHP and CodeIgniter, integrating Authorize.net, CyberSource, and PayPal to support high-volume e-commerce transactions.
- Built backend systems backed by MySQL that enabled customer service teams to manage orders, discounts, promotions, and refunds efficiently.
- Improved checkout performance and user experience through optimized HTML5 interfaces, contributing to increased conversion rates.

Senior Full Stack Software Engineer

Classtop-Draper, UT

January 2008 to November 2010

- Maintained and extended a legacy C# application while developing new PHP-based systems integrating early Facebook APIs.
- Designed and implemented a custom database strategy to resolve severe performance issues caused by large many-to-many relationships.
- Significantly improved application performance and scalability for a growing student-focused user base.

Full Stack Software Engineer

Stevens-Henager College-Salt Lake City, UT

April 2002 to October 2006

- Built and maintained multiple ColdFusion-based systems handling student records, admissions, and financial data.
- Developed internal reporting and scheduling tools that streamlined administrative workflows and reduced manual processing.
- Improved system reliability and performance across production servers supporting critical academic operations.

Education

Computer Programming (Bachelors of Science)

Stevens-Henager College

2002 to 2006

Computer Science (Bachelor's degree)

Skills

- MySQL

- PostgreSQL
- PHP
- Next.js
- React
- HTML5
- UI design
- Typescript
- CSS

Languages

- English - Fluent
