Lehi, UT 84043 | +1 801 440 5615 | andrewgbliss@gmail.com | linkedin.com/in/andrewgbliss

Professional Summary

Experienced full stack software engineer seeks full time employment. Managed many successful web apps using React, TypeScript, Node.js, and PostgreSQL. Developer who likes to get things done in the most efficient way using best practices. Can do type of person who loves to help and mentor people.

Relevant Skills

React, TypeScript, Node.js, Tailwind CSS, PostgreSQL, Docker. I use these skills to build responsive frontend applications, backend api's, deploying CI/CD.

Experience

Senior Full Stack Software Engineer Carketa | Lehi, UT

September 2022 to Present

- Managed a legacy system in PHP and built a new system using React, Next.js.
- Built a vehicle reconditioning system where dealerships could create tasks, take photos, push to seller api's, in real time.
- One issue we faced was having so many vehicle records per day, so in BigQuery and PostgreSQL I built a daily aggregation script that would build partitions, create views, ensure correct indexes so that it was incredibly fast to query on the front end.

Senior Full Stack Software Engineer nth-child consulting | Orem, UT

December 2017 to September 2022

- Managed a legacy system in PHP and built a new solar appraisal software using React, Next.js.
- Built appraisal software for solar companies to sell construction contracts for installing solar panels.
- One issue we faced is our customer service software wasn't real time in the legacy system it was polling. So I built a queue using Node.js and Redis so customer service could pick up calls and chats with no downtime.

Education

Computer Programming (Bachelors of Science) Stevens-Henager College
