

Andrew Bliss

Software Engineer

Lehi, UT 84043 | +1 801 440 5615 | andrewgbliss@gmail.com | linkedin.com/in/andrewgbliss

Professional Summary

Software engineer with 9+ years of experience designing, building, and scaling production web applications. Specializes in React, Next.js, Node.js, and PostgreSQL/BigQuery-based data systems, with a track record of migrating legacy platforms to modern architectures and building real-time, high-throughput backend systems.

Relevant Skills

Frontend: React, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, PHP

Data: PostgreSQL, BigQuery

Infrastructure: Docker, CI/CD pipelines

Experience

Software Engineer Carketa | Lehi, UT

September 2022 to Present

- Led the migration of a legacy PHP system to a modern React/Next.js architecture, modernizing core platform workflows.
- Architected and built a vehicle reconditioning system that lets dealership teams create tasks, capture photos, and push updates to seller APIs in real time.
- Built a daily data aggregation pipeline spanning BigQuery and PostgreSQL, including table partitioning, materialized views, and indexing strategy, to keep dashboard queries fast as daily vehicle record volume grew.

Software Engineer nth-child consulting | Orem, UT

December 2017 to September 2022

- Led the transition from a legacy PHP system to a new solar appraisal platform built with React and Next.js, used by solar companies to manage and sell installation contracts.
- Replaced a polling-based customer service system with a Node.js and Redis-backed queue, enabling real-time call and chat handling with no downtime for the support team.

Education

Computer Programming (Bachelors of Science)
