

Andrew Bliss

Senior Full-Stack Software Engineer

Lehi, UT 84043 | +1 801 440 5615 | andrewgbliss@gmail.com | linkedin.com/in/andrewgbliss

Professional Summary

Experienced full stack software engineer with a track record of many shipped successful web apps using React, TypeScript, Node.js, and PostgreSQL. Developer who likes to code, solve hard problems, has empathy to help anyone and mentor people.

Relevant Skills

Frontend: React, Next.js, TypeScript, Tailwind CSS

Backend: Node.js, PHP

Data: PostgreSQL, BigQuery

Infrastructure: Docker, CI/CD pipelines, AI Tools, Claude, Cursor

Experience

Software Engineer Carketa | Lehi, UT

September 2022 to Present

- **Led migration of a legacy PHP system to React/Next.js**, modernizing core platform workflows and improving maintainability.
- **Architected a vehicle reconditioning system** enabling dealership teams to create tasks, capture photos, and sync updates to seller APIs in real time — adopted by 10 new dealerships per month.
- **Built a daily data pipeline across BigQuery and PostgreSQL** — including table partitioning, materialized views, and indexing strategy — cutting dashboard query time by 75% as vehicle record volume scaled.

Software Engineer nth-child consulting | Orem, UT

December 2017 to September 2022

- **Led the transition from a legacy PHP system to a solar appraisal platform** built with React and Next.js, driving hundreds of new solar company sign-ups to manage and sell installation contracts.
- **Replaced a polling-based customer service system with a Node.js/Redis-backed queue**, cutting customer wait times by 25% with zero downtime for the support team.
- **Built and shipped a custom proposal tool** for solar companies to generate and send build proposals, increasing revenue by 10%.

Education

Computer Programming (Bachelors of Science)
